

Sukira Harris

Boston, MA | harris.su@northeastern.edu | (617) 909-2688 | [LinkedIn](#) | Availability: January - August 2027

EDUCATION

Northeastern University, Khoury College of Computer Sciences Boston, MA
Candidate for Bachelor of Science in Computer Science, AI Concentration, Neuroscience Minor Apr 2028
GPA: 3.61/4.0; Dean's List
Activities: Avenue (Creative Director), Northeastern Run Club (Nationals 2024)
Relevant Coursework: Object-Oriented Design, Algorithms & Data Structures, Computer Systems, Cloud Computing, Discrete Structures, Software Engineering, Math Foundations for AI, Principles of Artificial Intelligence

TECHNICAL SKILLS

Languages: Python, Java, C, MATLAB, Assembly x86-64, Racket, VBA
ML & Data: SLEAP, DeepLabCut, Anipose, LightGBM, scikit-learn, pandas, NumPy, SciPy
Tools & Platforms: Linux, Git, IntelliJ, VS Code, Eclipse, AWS

WORK EXPERIENCE

INTERACT Animal Lab, Northeastern University Boston, MA
Animal-Computer Interaction Research Apprentice Sep 2026 -Present

- Develop animal enrichment systems using sensors, microcontrollers, and interactive software
- Prototype hardware-software interfaces that respond dynamically to animal behavior with sensory feedback
- Collaborate with Museum of Science researchers to translate prototypes into deployable enrichment systems

Northeastern University Boston, MA
CO-OP Class Teaching Assistant Sep 2026 - Present

- Coach 20+ students on resumes, cover letters, LinkedIn profiles, and co-op job search strategies
- Conduct technical and behavioral mock interviews, providing targeted performance feedback
- Co-teach classes, lead weekly office hours, and develop career workshops with faculty for co-op preparation

KARAT London, England
Quantitative Research / Machine Learning Intern Aug 2026 - Sep 2026

- Shipped a probabilistic gold volatility model using LightGBM quantile regression and conformal prediction
- Delivered 80% prediction intervals 26% narrower than the historical baseline at equal coverage
- Built walk-forward and adversarial tests that detected look-ahead leakage and eliminated four false positives
- Corrected 75-83% miscalibration using Mondrian conformal calibration, holding 79-80% coverage in all regimes

Engert Lab, Harvard University Boston, MA
Computational Neuroscience Research Intern Jan 2026- Apr 2026

- Developed 3D multi-animal pose tracking for zebrafish and medaka using SLEAP, DeepLabCut, and Anipose
- Designed multi-camera calibration and alignment workflows in MATLAB for accurate 3D reconstruction
- Built image-processing pipelines for preprocessing, frame alignment, and HDF5/PNG conversion
- Improved 3D tracking accuracy by correcting multi-view camera misalignment and geometric distortion

Origin Sciences Cambridge, England
Scientific Research and Development Internship Sep 2023- Jan 2024

- Deployed a VBA purchase order system with validation and exports, reducing manual entry by ~50%
- Developed a method to detect low-frequency colorectal cancer mutations, improving mutation detection accuracy
- Awarded company shares for developing VBA systems adopted across lab teams and research contributions

PROJECTS

TC-ADR Manager VS Code Extension Sydney, Australia
Developer: [Extension](#) June 2026

- Developed a VS Code extension for tracking Technical Credit within Architecture Decision Records
- Built interactive forms and dashboards to create, manage, and visualize Technical Credit annotations
- Implemented structured metadata to track architectural benefits, signals, and confidence within ADR workflows

INTERESTS AND HOBBIES

Interests & Hobbies: Neurotechnology, Data Visualization, Marathon Running, Cycling, Solo Travel, Surfing, Reading
